Introduction

Welcome to the Student Management System (SMS 2.5) User Manual. This comprehensive system streamlines academic institution management by providing specialized interfaces for administrators, staff, and students. This manual introduces key features and provides step-by-step instructions for each user role.

Purpose of the System

The Student Management System enables educational institutions to: - Manage courses, subjects, and classes - Track staff and student information - Record and monitor attendance - Manage student feedback and leave requests - Conduct online classes - Generate reports and analytics

User Roles

The system supports three primary user roles: 1. **Admin/HOD (Head of Department)**: Manages all aspects of the system, including user accounts, courses, classes, staff, and students. 2. **Staff**: Manages classes, attendance, results, and interacts with students. 3. **Students**: View attendance, results, provide feedback, apply for leave, and attend online classes.
